

WHO ARE WE?

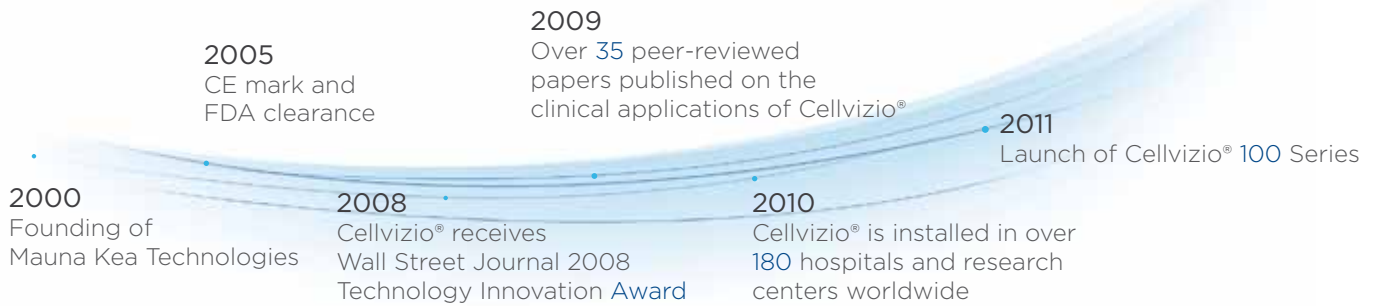

Global medical device company and **leader** in the endomicroscopy market

Providing innovative diagnostic solutions through the development of **advanced imaging** modalities

Multidisciplinary teams working in close collaboration with physicians and medical specialists in the development of new clinical applications

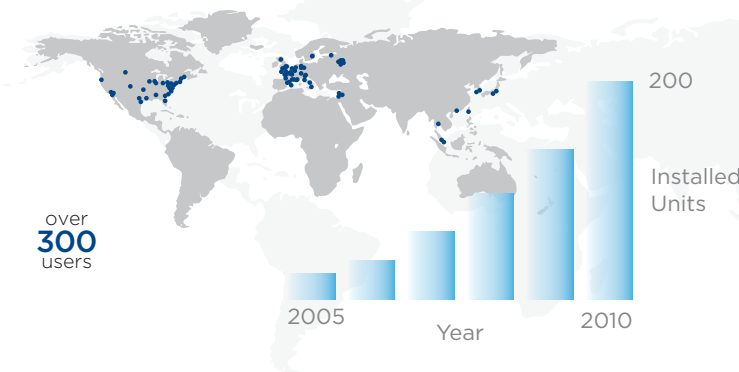

Fully integrated with a portfolio containing over 140 patents

COMPANY MILESTONES

A GLOBAL PRESENCE

We have forged partnerships with world renowned hospitals and research centers across the globe and are now serving the community of gastroenterologists and pulmonologists

Cellvizio®

Only probe-based Confocal Laser Endomicroscopy (pCLE) system to provide physicians and researchers high resolution cellular images of tissue *in vivo*, in real-time

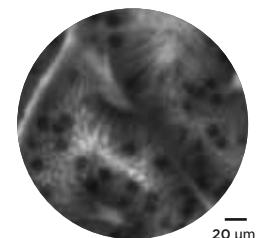

10,000 patients have benefited from Cellvizio®

over 30 leading US hospitals use Cellvizio®

AT THE FOREFRONT OF CANCER DETECTION

- Real-time access to histologic information
- Significant clinical data on Barrett's Esophagus and Colon disease characterization with strong potential in pulmonology
- Immediate cellular information allowing real-time decision making and facilitating diagnosis and therapy in a single procedure⁶
- Potentially reducing the number of physical biopsies leading to more efficient screening/surveillance and a less invasive procedure for the patient^{4,5}
- Improved sensitivity leading to more malignant patients/lesions found and better treatment options for patients^{1,2,3,4,6}
